

## **North West area report – Autumn 2019**

We have four meetings a year in the North West. They are held in June, September, December and March.

Attendance numbers vary from 12 to 25 members.

We aim to have educational content at each meeting and this year we have had presentations on:

- Pelvic Floor Dysfunction and the Role of the Colorectal Surgeon
- Nocturnal Polyuria
- Recurrent UTI's and New Developments in the Management of UTI
- Interstitial Cystitis and the Management of Painful Bladder Syndrome
- The Bay Integrated Bladder Team Female OAB Pathway

We have had the following companies come to demonstrate equipment / drug treatments:

- MAPLe
- Noqdirna
- Qufora
- Imedicare

There is always time to discuss complex cases and issues arising locally. Everyone is very supportive and willing to share which makes the meetings very enjoyable
