

## South Midlands area report – Autumn 2019

We have successfully hosted some great courses this year including “Men’s Health” and “Advanced Pelvic Floor dysfunction”. In October 2019, we also plan to run a pregnancy related course.

9 members attended the last full area meeting on “Men’s Health”. Unfortunately due to clinical demands of work and the large geographical area further events have been difficult to arrange. I have therefore proposed to the South Midlands group that we split into areas. South East England to include Oxford and then East Midlands for the known Bucks and Northants members. I will await feedback from members and request support at the representative AGM about tackling this.

I have also asked if anyone would like to volunteer to be a second area representative to cover their region but have had no response thus far. We have had one full member receive her post graduate qualification, one completed MSc and I am aware of one retirement from NHS practice.

There was no need for an annual newsletter to the region; however I will be requesting any stories, service developments or achievements to share good practice aiming for release in September 2019.

The next proposed meeting is Thursday, September 19<sup>th</sup> 2019.

Angela Leung- Wright  
South Midlands area representative
